Amendments To The Specification:

Please amend the specification on page 19, line 31 to page 20, lines 1-21 as

follows.

The above examples and disclosure are intended to be illustrative and not

exhaustive. These examples and description will suggest many variations and alternatives to one

of ordinary skill in this art. All these alternatives and variations are intended to be included

within the scope of the claims, where the term "comprising" means "including, but not limited

to". Those familiar with the art may recognize other equivalents to the specific embodiments

described herein which equivalents are also intended to be encompassed by the claims. Further,

the particular features presented in the dependent claims can be combined with each other in

other manners within the scope of the invention such that the invention should be recognized as

also specifically directed to other embodiments having any other possible combination of the

features of the dependent claims. [For instance, for purposes of claim publication, any dependent

claim which follows should be taken as alternatively written in a multiple dependent form from

all prior claims which possess all antecedents referenced in such dependent claim if such

multiple dependent format is an accepted format within the jurisdiction (e.g. each claim

depending directly from claim 1 should be alternatively taken as depending from all previous

claims). In jurisdictions where multiple dependent claim formats are restricted, the following

dependent claims should each be also taken as alternatively written in each singly dependent

claim format which creates a dependency from a prior antecedent-possessing claim other than the

specific claim listed in such dependent claim below (e.g. claim 3 may be taken as alternatively

dependent from claim 2; claim 5 may be taken as alternatively dependent on claim 2, claim 3 or

claim 4; claim 12 may be taken as alternatively dependent from claim 11; etc.).]
